Key Word: Marketing strategies, the 5-star OPC, One Tambon one product

1. SIGNIFICANCE OF THE STUDY

The development of the national economy requires that the underlying economic stability and sustainable public sector, it has set a strategic framework for economic development Thailand. By looking at the overall system. And aims to maintain the growth of Thailand's economy, quality and stability. Focus on the balance between economic development in the village, which is the foundation that relies on the development of primary (Unit of Development) as well as the network under the district. To create a link to the domestic economy with the global economy under the liberal economic system. It has provided the "One Tambon One Product" since 2001, led by each local community used to develop a product. The idea is to let each village has a product (major) one type of product ingredients and available resources local quality products into a feature point of sale in accordance with the local culture. The OTOP products does not refer to the product alone. It includes the conservation of natural resources and the environment local treatment tourism, culture and the local elite. The knowledge exchange, In order to become a quality product feature their own unique (www.thaitambon.com.(2007), the government is ready to come to the aid of modern knowledge management of the community to link the product to the market with a store network and the internet. Encourage and support local development processes to build a strong, self-reliant communities. The people involved in bringing resources and local knowledge to develop more modern innovations into products and quality service are standard features that are unique and can add value to meet the needs of both domestic and foreign.

"One Tambon One Product" policy of the government is looking to promote and support the local developer community to build a strong, self-reliant. Monetization of local knowledge to develop value-added products to meet the needs of the market. The Board of Directors of the National One Tambon One Product (CHE the Sub-through.) was responsible for the product category under the "One Tambon One Product" can be divided into six groups. (www.thaitambon.com.(2007).

1. Food means agricultural products and processed foods, which has received FDA and packaging to distribution base. Agricultural products such as vegetables, edible agricultural products as raw materials, primary processing such as rice, meat, fresh fish, and fresh food cooked ready.

2. Drink referring to products such as alcoholic beverages and fermented liquor and distilled spirits or alcoholic beverages are included. Beverage product categories and

types of juice, coffee makers, such as dissolved water, juice, and herbal tea powder, ginger powder, Chinese quince.

3. Costume fabric means woven and knitted fabrics from natural fibers or synthetic fibers. Body Jewelry clothing products from all types of materials.

4. Used / Decoration refer to products that are used in the home or decorate attractions. Utensil or furniture as well as artifacts that reflect the lifestyle of local and regional culture is divided into seven categories: wood, metal, basketry, artificial flowers, ceramic / pottery, textiles and more.

5. Art / Craft souvenir stands artifacts that reflect the lifestyle, local knowledge and local culture

6. Food and Beverages mean herbal products or herbs such as herbal medicine, herbal cosmetics, detergents, herbal repellents or insecticide used in agriculture as well as herbs.

The selection of OTOP products will be selected at the national level only. There are criteria in three areas: products and the strength of the community guidelines, guidelines possibilities in the market and guidelines of standard products are also a selection of the best OTOP products or OTOP Product Champion (OPC) with the aim to provide opportunities for local products at the root level have the opportunity to develop quality standards for export are the best products of the province and the country as well as the associated standards. From regional to international (Local Link Global Reach) product has a level 1 2 3 4 5 star by five stars are the highest. A good quality product beautiful patterns and the needs of the market, 4-star and 3-star level, the lower the level 2 and 1 star is still developing. The government's focus on developing standards by pushing OTOP products must be developed and community standard before entering into the selection of the top OTOP products as well as training entrepreneurs across the country under the "Smart OTOP" The concept is to create a model for community development. And contributes to the development of the power of the community to contemplate, to share responsibility for development. Lifestyle issues can be intentionally altered. There are guidelines for implementation Based on the concept of sufficiency economy to develop their own Most rely on the community to provide the community with the development of the core www.thaitambon.com.(2007).

Performance One Tambon One Product of the province over the past year since 2011-2013 OTOP products that have been the focus of many people. Observed from sales of OTOP products higher up the order shown in Table 1.

Table 1 shows the community and local products (OTOP) in Chiang Mai for the past 3 years.

- 2) To study the Marketing mix factors that influence the purchasing behavior of OTOP: fabric and apparel within ChiangMai.

3. THEORIES AND LITERATURE REVIEWS

THEORIES

1. The basic principles and concepts of the One Tambon One product One Tambon

One Product (OTOP) is one of the policy priorities of the government. The goal is to focus on each local community has led to the development of products by the government is ready to help with the modern knowledge. And management to link from the community the market both at home and abroad (OTOP 5 STAR.(2007). The concept is focused on the process of product revenue in local communities to

support and encourage product innovation. The activity of innovation and product development, marketing, production management and the application of technology to produce quality products. Be accepted the local authorities need to be self-reliant. (Self-reliance) is primarily involved in this movement devoted to physical forces (Energy), creativity (Creativity) and wishes (Desire) to find local resources primarily to the creation of revenue into the community. In addition to cultural heritage the best of local traditions to live on laid the cornerstone of the country and Thailand. The concept of such a concept requires that each village has one main product types which the products are used as raw materials local resources reduce migration to large cities. The economy that creates communities to happen. This concept is consistent with the economic development just as the royal majesty of the One Tambon One Product. The guidelines for the promotion and creation of products available in the community. The guidelines for the production, marketing, management, technology manufacturing and managing local resources into quality products are sold in accordance with the culture. Each district known throughout the world.

One Tambon One product and one approach is to create prosperity for the community and as a tool to stimulate the learning process. The action continued economic development and to raise the standard of living of people in the community for the better. It is a strategy that relies on the development of the village as a unit (Unit of Development). Basic and includes a network under the district. Have their own unique features that are consistent with the local culture. They can be distributed both inside the country and outside the country. So, the basic principles are as follows:

- 1) Local knowledge International (Local to Global) manufactured to quality standards. The continued development consistent with the culture and has featured only. The market acceptance Domestic and global markets
- 2) Self-reliance and creativity (Self-Reliance-Creativity) have raised the idea of innovation and product development in order to get the best possible. With regard to revive the local culture. A unique and appropriate to meet the unique village. Or district is generally accepted.
- 3) The human resources (Human Resource Development), creating individuals with a broad knowledge can achieve in society. A marketing plan focus on the production and management with regard to mainstream consumers.

2. Marketing mix

Marketing mix refers to a group of marketing companies to determine the purpose of the target market (Wanida Permsiri. (2005,p.12). The marketing mix is divided into 4P's (products prices places and promotions) as follows:

2.1 Product means the first variant is a combination of goods and services that the company selected to match the requirements of target markets are the main characteristics which are detailed below.

- 1) A variety of products (product variety).
- 2) The quality of the product (quality).
- 3) Format and design (design).
- 4) For the look or appearance of products (features).
- 5) The brand name of the product (brand name).

- 6) Packaging the packaging of products (packaging).
- 7) Product size (sizes).
- 8) Of products (services).
- 9) Warranty (warranties).
- 10) The product returns (returns).

2.2 Price mean the value of money is required for the exchange of products and services. The details are as follows:

- 1) The price or prices specified in the list (list price).
- 2) A discount price (discounts).
- 3) The price of the permits (allowances).
- 4) For a period of payment (payment period).
- 5) Conditional loans (credit terms).

2.3 Distribution refers to the event by distributing its products through intermediaries or agents are shipped to various locations to meet the needs of customers, which are detailed below.

- 1) Channels
- 2) Coverage
- 3) The use of the channel
- 4) Location
- 5) Inventories
- 6) Transportation
- 7) Logistics

2.4 Promotion means activity data communications market, so that customers recognize and buy its products. The details are as follows:

- 1) Sales promotion
- 2) Advertising
- 3) Personal selling or Sales force
- 4) Public relations
- 5) Direct marketing which includes a promotional mailing and promotional telephone and Internet.

3. Marketing Strategy

The marketing strategy is based on the type of business as well. For business that sells products in general. The marketing strategy will cover four key areas, known as the 4P's, which are detailed below.

3.1) Product strategy

Product strategy define and develop ideas about the benefits and value that operators need to offer tangible prospects to come out in the form of goods or services.

- Product mix (to offer any product to the target audience).
- Different qualities (to make a satisfactory product to the audience).

- Trademarks and Brands (makes the audience remember and appreciate how the product is presented).

3.2) Pricing strategy

Pricing strategies meant to define ways and means to set prices. The objective is to keep the business competitive in the market effectively and gain as needed. There are three main strategies in pricing approaches, for examples, 1) Above the market pricing, 2) Meet the market pricing and 3) Below the market pricing.

3.3) Distribution channels strategies

Distribution channel strategies represents a different mechanism that involves making the product flow from suppliers to consumers to use or consumption through various intermediaries to manage sales channels is running smoothly and quickly. Product and spread evenly, extensive coverage, meet the needs of consumers. The choice of distribution channels can consider three important ways.

3.4) Promotional Strategy

Promotional strategy is to assign the design guidelines and how to integrate marketing communications activity in the form of Advertising, Sales promotion, Public relations, Personal selling and Direct marketing. The event at the counter as well as arranging or attending exhibitions or fairs. As well as other activities that fall under the concept of a desirable image of the company to communicate directly to the target clearly. The budget is limited to maximum efficiency.

4. Consumer Behavior

Consumer behavior refers to the act of any person who deals directly with supply.

The acquisition and use of products and services, including the decision-making process which already exists and which are set to take part in such actions. The consumer market is the study of shoppers, marketers must consider the decision to buy the place.

So the question is asking for consumers to make the marketers know and to identify good marketing strategy to effectively model the 7 O's model to study the market, any new understanding and consumer behavior based on a model called the 7 O's Model, The questions and answers are shown in Table 2.

Table 2 shows the model questions and answers 7 O's.

(Source : Srisupang Sahachaiseri.(2005) p.148-152)

4. LITERATURE REVIEW

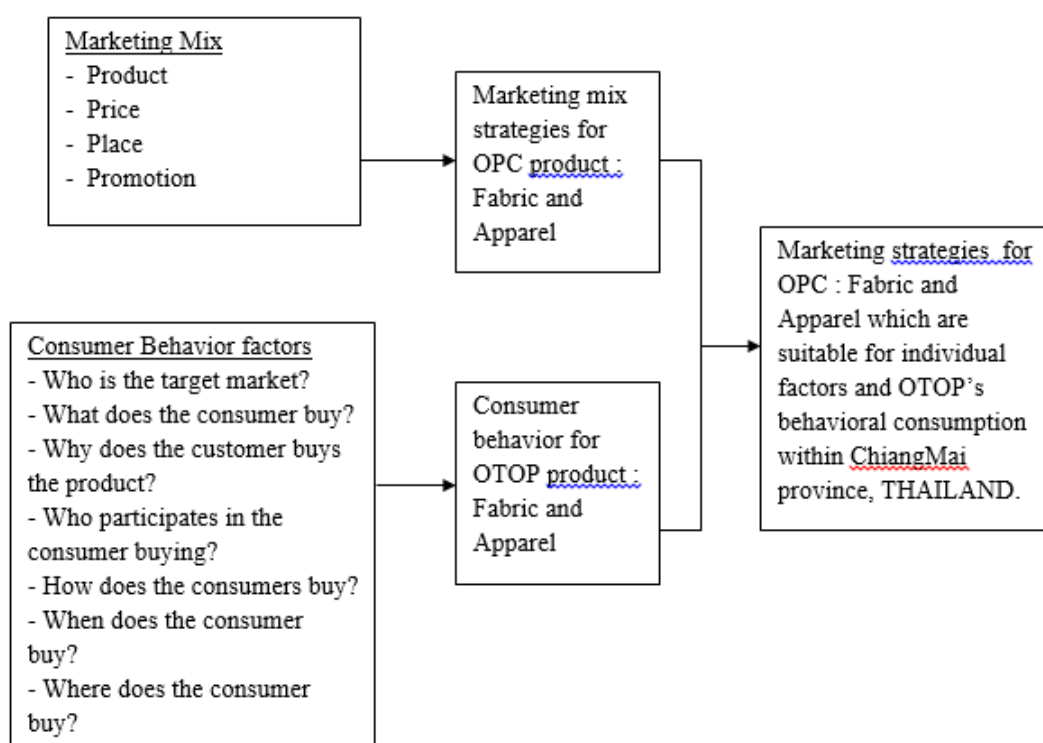

Lamyong Santawee (2007) conducted a study on the integration of marketing promotions for OTOP products to Thailand in the Asia-Pacific economies. Objective to study 1) Integrated Marketing format for One Tambon One Product within Thailand 2) An exporter's characteristics of OTOP Thailand products and other countries that produce goods to sell 3) Comparison OTOP Thailand various aspects during the operation, distribution format and countries that export manufacturer with an integration of marketing promotions. Using questionnaires, representing manufacturers of 6 results revealed that: 1) the sample is opine that direct marketing is the most powerful 2) Silk product of Thailand are integrated promotion and marketing more than other types 3) Entrepreneurs whom operated under 2 years are integrating marketing promotions over the others period of operation 4) Sample with a pattern of distribution by established exporter's integrated promotion rather than the form of other distributors and 5) Exports of OTOP products from Thailand to Australia have the integration of marketing rather than other countries.

Supus Chaicharn (2007) studied 1) The public's opinion on OTOP products in ChiangRai involving the marketing mix factors which are consisting of product factors, price factors, place factors and promotion factors. 2) To study ways of developing the business of the public opinion, OTOP products within ChiangRai. The marketing mix found that overall of the respondents have been featured in the marketing mix is moderate and the highest is place factors, promotion factors, product factors and price factors respectively. Product factors, the respondents have considered the importance of buying products OTOP in ChiangRai is moderate and the highest average is the standard of product quality, subordinate, the product have to many forms to choose, the attractiveness packaging and high quality respectively. Price factors, the respondents have considered the importance of buying products OTOP in ChiangRai are moderate and the highest average is the prices list have to reasonable for the quality. Place factors, the highest average is the shops have to close up with the tourist attractions. Promotion factors, the highest average is to display in the exhibition on the occasion of the annual event or festival of the province. In summary, a review of literature above to synthesize different variables used in this study is the marketing mix: 1) product factors to take into account the unique product design, difficult to counterfeit, high quality ingredients with the highest standards, the renowned brand products, 2) price factors to take into account the cost of production and the reasonable selling price 3) place factors to take into account its location, easy access and easy shopping, and 4) promotion factors to take into account the use of various marketing tools to promote the purchase of more products.

Consumer behavior factors are consist of : 1) Who is your target customer will account privacy 2) What products regardless of the category and type of products available to

third) products, where it is considered the place of purchase. 4) purchase when you take into account the duration of the purchase, 5) Why should you buy products to take into account the purpose and reason to buy the product 6), who influence the purchase will take into account the influence of selection. Purchase and 7), however, would buy the product regardless of the method or model to buy and pay for the purchase. When applied to synthetic variants in order to answer the purpose of research, it can be shown that the research framework.

5. THE RESEARCH CONCEPTUAL FRAMEWORK

6. THE RESEARCH METHODOLOGY

This research is a survey research and in-depth interviews , the researchers studied the marketing strategy and the marketing mix factors that affect consumer behavior OTOP fabric and apparel community within ChiangMai Province.
